

Interactive Brilliance. Inspired Classroom Learning.

mantle

At close to 3,000 kilometers (1,865 miles) thick, this is Earth's thickest layer. It starts a mere 30 kilometers (18.6 miles) beneath the surface. Made mostly of iron, magnesium and silicon, it is dense, hot and semi-solid (think caramel candy). Like the layer below it, this one also circulates. It just does so far more slowly.

inner core

This solid metal ball has a radius of 1,220 kilometers or about three-quarters that of the moon. It's located some 6,400 to 5,180 kilometers (4,000 to 3,220 miles) beneath the surface. Extremely dense, it's made mostly of iron and nickel. The inner core spins a bit faster than the rest of the Earth.

outer core

This part of the core is also made from iron and nickel, but in a liquid form. It sits some 5,180 to 2,880 kilometers (3,220 to 1,800 miles) below the surface. Heated largely by the radioactive elements uranium and thorium, this liquid churns in huge, turbulent currents. That motion generates electrical currents. The

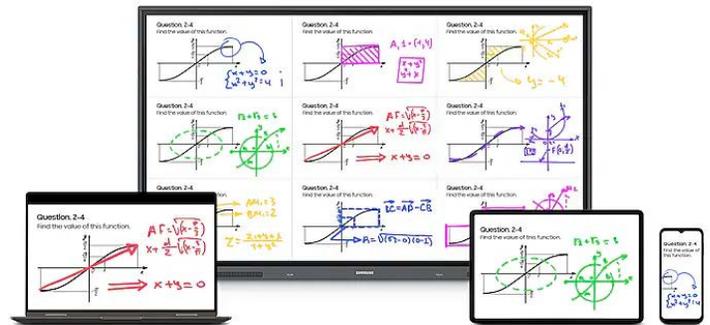

earth's layers

SAMSUNG

Introducing the WAC Series 65" and 75" interactive displays. Built based on feedback from education partners and end-users, Samsung's newest interactive displays are **Android OS-based displays** to provide a familiar and intuitive user experience for teachers and students.

Key Features

- Android OS
- Easy Multitasking
- Powerful Screen Sharing
- Intelligent App for Class
- Multi-point Touch Drawing
- Dual Pen

Samsung Interactive WAC Series

SAMSUNG

A powerful easy-to-use interactive display that instantly transforms classrooms into collaborative learning hubs. Teach and inspire, whether students are in class or at home. The Samsung Interactive Pro gives educators the tools needed to elevate learning, engagement and collaboration for every student. With versatile connectivity, intelligent software and intuitive features, Interactive Pro enriches classrooms to make collaborative learning shine.

Easily flex between in-person, hybrid and remote

- All-in-one integrated video conferencing, whiteboard, touchscreen, embedded web browser, and more
- Up to 20 touch points
- Smooth pen-to-paper-like writing experience
- Flexible image editing tool
- Annotate on any content, and easily import/reuse content in a variety of formats

Samsung Interactive WBM Flip Pro

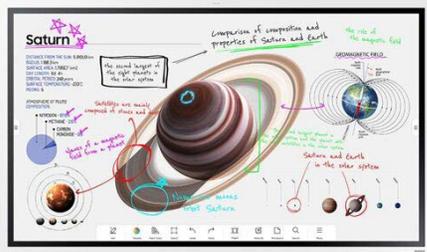

Effortlessly Share

- Intuitive UI/UX to share any content, anywhere
- Share from any device regardless of OS
- Built-in Apple Airplay
- Wall or cart mountable, easy everything
- Easy to set up and manage
- Ready for use the moment it's turned on
- A simple U/X anyone can use
- Centrally manage all your interactive displays remotely
- OTN firmware updates
- Knox enterprise security
- 5-Year Warranty
